YOUR SPEAKERS

Charles Swanson

Charles is a professional security and risk consultant, with experience in all areas of security and risk management. He has also been involved in security surveying and security/risk management training and management development for twenty years, with experience in Europe, the Middle East and the USA.

He holds an MSc in Security Management from the University of Leicester, a Post Graduate Diploma in Terrorism Studies from St Andrews University and I am a Fellow of the Security Institute; he is also registered as a Chartered Security Professional and applicant interviewer.

Charles co-authored an MSc in International Security and Risk Management for the University of South Wales, and he is the Senior Tutor and Dissertation Supervisor on that course.

Moreover, he has recently written and published a number of professional and academic articles, as well as a book titled Professional Security Management; A strategic approach published by Routledge, which is part of the Taylor Francis Group. He is currently authoring a second book to be published by Routledge, and co authoring a publication devoted to the impacts of terrorism on children.

Chrysanthi Laimou

Chrysanthi has been a security professional for the past ten years, focusing mostly on designing & implementing supply chain security solutions for the High Value Theft Targeted markets. Nowadays, she leads the internal and external vocational and academic training programs of Diaploous.

Her academic background consists of undergraduate studies in Mechanical Engineering and postgraduate studies in Forensic Engineering & Science. She has also been a Transported Asset Protection Association EMEA Trainer on the FSR & TSR Supply Chain Security Standards since 2015.

She has also participated in and led several loss investigations in the supply chain mainly in the electronics and pharmaceutical/cosmetics sector. She has also supported companies in setting up their internal management system in regards to supply chain security as well as designed and implemented their internal supply chain security and loss prevention awareness training programs.

During her professional life, she has taken part in conferences and seminars which among others were focusing on accident reconstruction, supply chain resource optimization & cyber threats, as well as last-mile logistics.
